Since 2019

INSTANT INTERNATIONAL

CONNECTING CHEMICALS TOWARDS INNOVATION

About Us

Instant International is a dynamic chemical distribution and international trading company engaged in the distribution, import, and export of a diverse range of chemicals across global markets.

With a strong focus on quality, reliability, and customer satisfaction, we strive to build long-term partnerships and provide seamless access to quality chemical products.

Our capabilities also extend to research and development support, helping businesses explore innovative chemical solutions.

Your Global Business Growth Partner

Strategic business associate for domestic and international companies to establish, strengthen and expand their presence in global markets.

Our Mission

To deliver reliable, high-quality, and cost-effective chemical solutions through efficient distribution, global sourcing and international trade.

Our Vision

To become a globally recognized and trusted name in chemical distribution, international trading, and strategic business development.

Industries We Serve

Food & Beverage Industry

Home & Personal Care Industry

Pharmaceutical & Nutraceutical Industry

Animal Feed & Veterinary Nutrition Industry

Agriculture, Fertilizers & Agrochemicals Industry

Water Treatment & Chemicals

Paints, Coatings, Plastics & Rubber Industry

Metal Treatment, Electroplating & Surface Finishing Industry

Speciality Chemicals, Chemical Synthesis & Laboratory Reagents

Construction and Oil & Gas Industry

Textile, Leather & Paper Industry

INSTANT INTERNATIONAL

CONNECTING CHEMICALS TOWARDS INNOVATION

Sr. No.	Full chemical name	Short name / abbreviation	CAS number(s)	Chemical formula / composition
1	Benzalkonium chloride	BKC	8001-54-5 / 63449-41-2	-
2	Sodium benzoate	SB	532-32-1	$C_7H_5NaO_2$
3	1-Hydroxyethylidene-1,1-diphosphonic acid	HEDP	2809-21-4	$C_2H_8O_7P_2$
4	Basic copper carbonate (commonly supplied)	-	12069-69-1	$Cu_2CO_3(OH)_2$ (basic copper carbonate)
5	Copper(II) sulfate pentahydrate (common commercial form)	$CuSO_4·5H_2O$	7758-99-8 (pentahydrate); 7758-98-7 (anhydrous)	$CuSO_4·5H_2O$ / $CuSO_4$
6	Calcium propanoate	E282	4075-81-4	$Ca(C_3H_5O_2)_2$
7	Calcium octadecanoate	CaSt	1592-23-0	$Ca(C_{18}H_{35}O_2)_2$
8	Zinc octadecanoate	ZnSt	557-05-1	$Zn(C_{18}H_{35}O_2)_2$
9	Lead(II) acetate trihydrate (common form)	-	6080-56-4 (trihydrate); 301-04-2 (anhydrous)	$Pb(CH_3COO)_2·3H_2O$ / $Pb(CH_3COO)_2$
10	Magnesium octadecanoate	MgSt	557-04-0	$Mg(C_{18}H_{35}O_2)_2$
11	Lead(II) nitrate	-	10099-74-8	$Pb(NO_3)_2$
12	Methanal (formaldehyde)	FA	50-00-0	CH_2O
13	Copper(II) oxide	CuO	1317-38-0	CuO
14	Trizinc dicitrate (commonly zinc citrate dihydrate)	-	546-46-3 (anhydrous); 5990-32-9 (dihydrate)	$Zn_3(C_6H_5O_7)_2$ / $Zn_3(C_6H_5O_7)_2·2H_2O$
15	Polyoxymethylene (paraformaldehyde)	PFA	30525-89-4	$(CH_2O)n$
16	Zinc carbonate (often basic zinc carbonate commercially)	-	3486-35-9 (zinc carbonate); 5263-02-5 (basic zinc carbonate)	$ZnCO_3$ / $Zn_5(CO_3)_2(OH)_6$
17	Iron(III) chloride	$FeCl_3$	7705-08-0 (anhydrous); 10025-77-1 (hexahydrate)	$FeCl_3$ / $FeCl_3·6H_2O$
18	Diethylenetriamine penta(methylene phosphonic acid)	DTPMPA	15827-60-8	$C_9H_{28}N_3O_{15}P_5$
19	Iron(II) sulfate, dried (hydration state depends on grade)	$FeSO_4$	7720-78-7 (anhydrous); 17375-41-6 (monohydrate); 7782-63-0 (heptahydrate)	$FeSO_4·xH_2O$
20	Sodium nitrate	Chile saltpetre	7631-99-4	$NaNO_3$
21	Hexamethylenetetramine (methenamine)	HMTA / HMT	100-97-0	$C_6H_{12}N_4$
22	Zinc oxide	ZnO	1314-13-2	ZnO
23	Disodium molybdate dihydrate (common commercial form)	Na_2MoO_4	10102-40-6 (dihydrate); 7631-95-0 (anhydrous)	$Na_2MoO_4·2H_2O$ / Na_2MoO_4
24	Ammonium heptamolybdate tetrahydrate (common form)	AHM	12054-85-2	$(NH_4)_6Mo_7O_{24}·4H_2O$
25	Sodium butanoate	NaB	156-54-7	$C_4H_7NaO_2$
26	Sodium selenite (anhydrous)	-	10102-18-8 (anhydrous); 26970-82-1 (pentahydrate)	Na_2SeO_3 / $Na_2SeO_3·5H_2O$
27	Soy protein isolate	SPI	-	-
28	Soy lecithin	E322	8002-43-5	Mixture of phospholipids; no single molecular formula
29	Ammonium sulfate	AS	7783-20-2	$(NH_4)_2SO_4$
30	Cobalt(II) sulfate (often heptahydrate)	-	10124-43-3 (heptahydrate); 10124-43-3 is commonly used for hydrate listing	$CoSO_4·7H_2O$ (heptahydrate); $CoSO_4$

31	Copper(II) sulfate pentahydrate (common commercial form)	$CuSO_4·5H_2O$	7758-99-8 (pentahydrate); 7758-98-7 (anhydrous)	$CuSO_4·5H_2O$ / $CuSO_4$
32	Manganese(II) sulfate (often monohydrate)	$MnSO_4$	10034-96-5 (monohydrate); 7785-87-7 (anhydrous)	$MnSO_4·H_2O$ / $MnSO_4$
33	Zinc sulfate heptahydrate / monohydrate	$ZnSO_4$	7446-20-0 (heptahydrate); 7733-02-0 (monohydrate)	$ZnSO_4·7H_2O$ / $ZnSO_4·H_2O$
34	Diammonium hydrogen phosphate	DAP	7783-28-0	$(NH_4)_2HPO_4$
35	Potassium dihydrogen phosphate	MKP	7778-77-0	KH_2PO_4
36	Calcium hydrogen phosphate (dibasic calcium phosphate)	DCP	7757-93-9 (anhydrous); 7789-77-7 (dihydrate)	$CaHPO_4$ / $CaHPO_4·2H_2O$
37	Sodium dihydrogen phosphate	MSP / MSPP	7558-80-7 (anhydrous); 10049-21-5 (monohydrate); 13472-35-0 (dihydrate)	$NaH_2PO_4·xH_2O$
38	Disodium hydrogen phosphate (sodium phosphate dibasic)	DSP	7558-79-4 (anhydrous); 10028-24-7 (dihydrate); 7558-80-7 is NOT this substance	$Na_2HPO_4·xH_2O$
39	Tripotassium orthophosphate	TKP	7778-53-2	K_3PO_4
40	Ammonium dihydrogen phosphate	MAP	7722-76-1	$NH_4H_2PO_4$
41	Tricalcium phosphate	TCP	7758-87-4	$Ca_3(PO_4)_2$ (idealized)
42	Calcium dihydrogen phosphate	MCP	7758-23-8 (anhydrous); 10031-30-8 (monohydrate)	$Ca(H_2PO_4)_2·xH_2O$
43	Trisodium orthophosphate	TSP	7601-54-9 (anhydrous); 10101-89-0 (dodecahydrate)	$Na_3PO_4·xH_2O$
44	Calcium amino-acid chelate/complex	-	-	-
45	Copper amino-acid chelate/complex	-	-	-
46	Iron(II) amino-acid chelate/complex	-	-	-
47	Magnesium amino-acid chelate/complex	-	-	-
48	Manganese(II) amino-acid chelate/complex	-	-	-
49	Mixed mineral amino-acid complex	-	-	-
50	Ammonium zinc EDTA (ammonium zinc ethylenediaminetetraacetate)	Zn-EDTA ammonium	-	-
51	Sodium ferric EDTA (iron sodium EDTA), often blended premix	NaFeEDTA	15708-41-5 (NaFeEDTA); premix has mixture-specific CAS	$C_{10}H_{12}FeN_2NaO_8$ (NaFeEDTA)
52	Magnesium EDTA	Mg-EDTA	14402-88-1 (commonly listed; hydrate/salt may vary)	$MgC_{10}H_{12}N_2O_8$ (often hydrated)
53	Calcium disodium EDTA	$CaNa_2EDTA$	62-33-9	$C_{10}H_{12}CaN_2Na_2O_8$
54	Copper(II) EDTA	Cu-EDTA	14025-15-1	$C_{10}H_{12}CuN_2O_8$
55	Cobalt(II) EDTA	Co-EDTA	-	$CoC_{10}H_{12}N_2O_8$ (nominal complex)
56	Zinc EDTA	Zn-EDTA	14025-21-9	$C_{10}H_{12}N_2O_8Zn$
57	Manganese(II) EDTA	Mn-EDTA	15375-84-5	$C_{10}H_{12}MnN_2O_8$
58	Ethylenediaminetetraacetic acid	EDTA acid	60-00-4	$C_{10}H_{16}N_2O_8$
59	Calcium EDTA (calcium ethylenediaminetetraacetate)	Ca-EDTA	23411-34-9 (commonly listed; form-dependent)	$CaC_{10}H_{12}N_2O_8$
60	Tetrasodium ethylenediaminetetraacetate	Na_4EDTA	64-02-8 (anhydrous); hydrate-specific CAS may differ	$C_{10}H_{12}N_2Na_4O_8$
61	Aqueous tetrasodium EDTA solution	Na_4EDTA solution	64-02-8 (active ingredient); solution is a mixture	Active: $C_{10}H_{12}N_2Na_4O_8$; water

62	Tetraammonium ethylenediaminetetraacetate	$(NH_4)_4$EDTA	-	$C_{10}H_{20}N_6O_8$ (nominal)
63	Sodium ferric EDTA (ferric sodium ethylenediaminetetraacetate)	NaFeEDTA	15708-41-5	$C_{10}H_{12}FeN_2NaO_8$
64	Ammonium ferric EDTA	NH_4FeEDTA	21265-50-9 (commonly listed; confirm grade)	-
65	Dipotassium ethylenediaminetetraacetate	K_2EDTA	2001-94-7 (commonly listed)	$C_{10}H_{14}K_2N_2O_8$
66	Disodium ethylenediaminetetraacetate	Na_2EDTA	139-33-3 (anhydrous); 6381-92-6 (dihydrate)	$C_{10}H_{14}N_2Na_2O_8{\cdot}xH_2O$
67	Aqueous diammonium EDTA solution	$(NH_4)_2$EDTA solution	-	-
68	Cobalt(II) nitrate hexahydrate (common form)	-	10026-22-9 (hexahydrate); 10141-05-6 (anhydrous)	$Co(NO_3)_2{\cdot}6H_2O$ / $Co(NO_3)_2$
69	Selenium(IV) oxide	SeO_2	7446-08-4	SeO_2
70	Sodium selenate (anhydrous)	-	13410-01-0 (anhydrous); 10102-23-5 (decahydrate)	Na_2SeO_4 / $Na_2SeO_4{\cdot}10H_2O$
71	Nickel(II) nitrate hexahydrate (common form)	-	13478-00-7 (hexahydrate); 13138-45-9 (anhydrous)	$Ni(NO_3)_2{\cdot}6H_2O$ / $Ni(NO_3)_2$
72	Nickel(II) chloride hexahydrate (common form)	-	7791-20-0 (hexahydrate); 7718-54-9 (anhydrous)	$NiCl_2{\cdot}6H_2O$ / $NiCl_2$
73	Nickel(II) sulfate hexahydrate (common form)	-	10101-97-0 (hexahydrate); 7786-81-4 (anhydrous)	$NiSO_4{\cdot}6H_2O$ / $NiSO_4$
74	Bismuth(III) oxide	Bi_2O_3	1304-76-3	Bi_2O_3
75	Sodium tungstate dihydrate (common form)	-	10213-10-2 (dihydrate); 13472-45-2 (anhydrous)	$Na_2WO_4{\cdot}2H_2O$ / Na_2WO_4
76	Metal salts (unspecified class/mixture)	-	-	No single formula
77	Aluminium tristearate / aluminium stearate (commercial grades may be mixed basic salts)	Al stearate	637-12-7 (aluminium tristearate; commercial grades may vary)	$Al(C_{18}H_{35}O_2)_3$ (idealized)
78	Sodium octadecanoate	-	822-16-2	$C_{18}H_{35}NaO_2$
79	Barium octadecanoate	-	6865-35-6	$Ba(C_{18}H_{35}O_2)_2$
80	Potassium octadecanoate	-	593-29-3	$C_{18}H_{35}KO_2$
81	Selenium disulfide (often called selenium sulfide)	SeS_2	7488-56-4	SeS_2 (nominal; material may be non-stoichiometric)
82	Selenium(IV) oxide	SeO_2	7446-08-4	SeO_2
83	Sodium selenate (anhydrous)	-	13410-01-0 (anhydrous); 10102-23-5 (decahydrate)	Na_2SeO_4 / $Na_2SeO_4{\cdot}10H_2O$
84	Pyridinium chlorochromate	PCC	26299-14-9	$C_5H_6ClCrNO_3$
85	Pyridinium dichromate	PDC	20039-37-6	$(C_5H_6N)_2Cr_2O_7$
86	Methyl 4-aminobenzoate (benzocaine methyl ester)	Methyl PABA	619-45-4	$C_8H_9NO_2$
87	Copper(II) chloride dihydrate (common commercial form)	$CuCl_2$	10125-13-0 (dihydrate); 7447-39-4 (anhydrous)	$CuCl_2{\cdot}2H_2O$ / $CuCl_2$
88	Copper(I) chloride	CuCl	7758-89-6	CuCl
89	Hexamethylenetetramine (methenamine)	HMT / HMTA	100-97-0	$C_6H_{12}N_4$
90	Dicopper chloride trihydroxide (copper(II) chloride hydroxide)	COC	1332-40-7	$Cu_2(OH)_3Cl$
